Patrick Cha, IEEM2008 Secretariat**

A different sort of room with a view, experience the most sensational sights at every turn – from Changi Airport to Singapore City, Sentosa Island and beyond into parts of the Malaysia Peninsula and Indonesia.

The ride lasts 30 minutes and there are 28 fully air conditioned capsules that can carry up to 28 people each. The wheel-like giant observatory is 165 meters (about 42 storeys) high.

The flyer operates throughout the evening and this leaves you the option to dine before the ride or in between dinner.

A dinner buffet that features local delights and international fare will be served.

Food – Singapore city is home to a delicious array of Chinese, Indian and Malay cuisines as well as culinary favourites from all over the world. Food is varied and wonderful, as there are street-side hawkers to Cordon Blue.
